## Its All About the Cuff

The embellishment of the wrist continues this season with the simple cuff bracelet elevated to jewel and crystal studded works of arts. Our gold brushed cuff bracelets are embellished with large vintage brooches that look amazing.

Cuffs range from metal based sleek to tribal influenced made with natural materials such as bone, wood and brass. Interesting materials such as brushed gold, hammered silver, vintage pearls and crystals have been used to create various looks.

Because of the thickness of cuffs, there is more room for decoration from vintage brooches encrusted with crystals and rhinestones to open clasp cuffs where crystals and rhinestones cover nearly half of the bracelet.

The bracelets on the left are from circa 1950s to the present and cover a range of styles from tribal, crystal glam, to sleek and modern to natural.

All of our bold one-off statement cuffs and bracelets are available from the Glamour Vintage section.
