Jewellery Trends - Pendants

The beauty of a pendant is use of a variety of stones and the designs available.

A focal piece hanging from a silver or gold chain suits those who do not want a 'full' necklace.

Pendants using semi precious stones in all their variety and cuts are popular and the teaming of semi precious with gold or silver charms also makes a great design.

Cuts ranging from faceted cut, polished, irregular, or a defined shape such as a rectangle or oval shape means that there is a style of pendant for everyone.

Semi precious stones used include Chalcedony, Jade, Aventurine, Amethyst, Prehnite, Aqua Jasper, Citrine, Botswana Agate and Quartz.

Pendants are available from the Gems Bijoux section of www.glamour39.com.
